EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kurt Summe on January 15, 2010.

The application has been amended as follows: Amend claims 15, 16, 19, 40, 53, and 54 as follows:

Claim 15, line 1, delete "wherein operational" and replace with - - wherein the operational - -.

Claim 16, line 1, delete "wherein operational" and replace with - - wherein the operational - -.

Claim 19, line 9 – line 10, delete "line of a peripheral device" and replace with - - line of the peripheral device - -.

Claim 40, line 8, delete "with a peripheral device" and replace with - - with the peripheral device - -.

Claim 53, line 1, delete "claim 42 wherein operational" and replace with - - claim 40 wherein the operational - -.

Claim 54, line 1, delete "claim 42" and replace with - - claim 40 - -.

2. The following is an examiner's statement of reasons for allowance: Independent claims 1, 19, 29, and 40 are allowable over the prior art of record since the cited references taken individually or in combination fail to disclose in particular a portable terminal having bi-directional voice capabilities, configured to be worn or carried by a user, and operable to facilitate the performance of tasks by the user through speech; and a peripheral device for coupling to the terminal and having at least one line for directing audio signals to the terminal; the peripheral device configured to generate a characterizing signal in the form of a non-speech data signal in an audio format and to forward the characterizing signal for a particular user on the at least one audio signal line to the terminal, the user characterizing signal being associated with one or more user-specific operational parameters for configuring the voice capabilities of the terminal, as per independent claim 1 with independent claims 19, 29, and 40 including similarly worded limitations. The closest prior art of record Bunte et al. (US 5,873,070) requires that a user speak a key word in order to select different dictionaries or templates when configuring bidirectional voice capabilities of a terminal. Other prior art of record, Anderson et al. (US 7,283,635), does not require a spoken key word,

however Anderson et al. utilizes serial communication on a wire separate from the audio wires of the peripheral device. Therefore, a combination of Bunte et al. with Anderson et al. would still be deficient in meeting all of the claimed limitations specifically the limitations requiring the characterizing signal in the form of a non-speech data signal in an audio format and forwarding the characterizing signal of the terminal on the at least one audio signal line to the terminal. Further combination with the other prior art of record would not have been obvious as explained by Applicant, beginning on page 18 and ending on page 22, in the remarks dated October 23, 2009. As such, Bunte et al. and Anderson et al. and likewise the other prior art of record do not disclose the above patentably distinct limitations of independent claims 1, 19, 29, and 40 and it would not have been obvious to one of ordinary skill in the art at the time of the invention to modify the prior art of record to include all the claimed limitations of independent claims 1, 19, 29, and 40.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
